

# Install Microsoft visual objective Tagging tool(VOTT):

Step 1:

## Step 2:

The screenshot shows the 'Project Settings' window in the VoTT application. The window has a dark theme and a sidebar on the left with icons for Home, Recent Projects, My Projects, My Datasets, My Models, and My Annotations. The main area is titled 'Project Settings' and contains several sections:

- Display Name\***: A text input field containing 'Annotations'.
- Security Token**: A dropdown menu with 'Generate New Security Token' selected. Below it, a small text says 'Used to encrypt sensitive data within project files'.
- Source Connection\***: A dropdown menu with 'Images (C:\Users\ELCOT\Desktop\yolo\_structure-master\Data\Source\_images\Training\_images)' selected. To its right is an 'Add Connection' button. Below it, a small text says 'Where to load assets from'.
- Target Connection\***: A dropdown menu with 'Images (C:\Users\ELCOT\Desktop\yolo\_structure-master\Data\Source\_images\Training\_images)' selected. To its right is an 'Add Connection' button. Below it, a small text says 'Where to save the project and exported data'.
- Description**: A large, empty text area.
- Video Settings\***: A section with the label 'Frame Extraction Rate (frames per a video second)\*'.

The bottom of the window shows a Windows taskbar with the search bar, taskbar icons, and system tray information including temperature (26°C), weather (Cloudy), and date/time (15:20, 14-11-2022).
